About Me

I'm a passionate IT enthusiast with a solid academic background in Computer Applications. Currently studying for my Master's in Computer Applications (MCA) after completing my Bachelor's degree (BCA). I'm excited to use both the theory and practical skills I've gained through my studies to contribute effectively to dynamic and innovative workplaces..

Projects

Efficient Classification model for Parkinson Disease Diagnosis—Jupyter- Python

To leverage Machine learning expertise in the healthcare domain by developing innovative methods for Parkinson's disease classification, feature selection and achieving optimal diagnostic accuracy.

Portfolio Web Site -Angular JS

Created a dynamic portfolio site with AngularJS, HTML, and Bootstrap. Sections for personal info, future projects, resume, and contacts. Ensured seamless accessibility and engagement with responsive design and interactive elements."
